Let
There
Be
Night

The PHM Planetarium spearheaded the [Let There Be Night](http://www.lettherebenight.com/) program, a global initiative in support of dark skies. In 2009, over 3,400 PHM students contributed to the experiment, from which a team of students made a 3-D model (above) to convey the results. See <http://www.lettherebenight.com/>.

The *PHM Planetarium & Air/Space Museum* is a unique facility valued by the students, parents, teachers, and administrators of the Penn-Harris-Madison School Corporation as well as the community at large. Visitors enjoy planetarium programs, a fine collection of air and space memorabilia, and observing programs with telescopes.

The *PHM Planetarium & Air/Space Museum* was a Midwest hub for programs related to the **June 8, 2004, transit of Venus**. See [june8.htm](#) for images related to the transit of Venus experience here; see [images.htm](#) for pictures from around and beyond the earth.

U.S. Secretary of Education Rod Paige sends a letter noting the efforts of the Penn-Harris-Madison School Corporation in creating and promoting transit of Venus education programs; December 16, 2004.

Indiana adopted Daylight Saving Time (DST) in Spring 2006. Additionally, the U.S. Dept. of Transportation has ruled on the requests of individual counties to change their time zone. St. Joseph County, Indiana, will remain in the Eastern time zone. For information on Daylight Saving Time (DST), see <http://webexhibits.org/daylightsaving/f.html> and scroll down to *Indiana*.

A public dialogue about time zone issues provided some lively discussions. In response to a newspaper columnist's assertions, Chuck Bueter wrote an opinion about the scientific (in)accuracy of some public comments at [timezone.htm](#). An Indiana study [questions](#) the merits of DST after Indiana's switch was implemented.

AstroCamp puts telescopes in the hands of kids at YMCA Camp Eberhart in Three Rivers, Michigan. For images from past astronomy camp adventures and for more information, see <http://analyzer.depaul.edu/paperplate/astrocamp.htm>. Next opportunity is **July 27 to August 2, 2008**.

Note: Web pages of the *PHM Planetarium & Air/Space Museum* which are hosted on transitofvenus.org are an unofficial compilation of the facility's resources. For the official PHM website, see <http://www.phm.k12.in.us/planetarium/>.
